

Spot the difference!

There are five dangerous things to spot in one of these kitchens. Circle them with a pen then colour in the kitchen you think looks safest.

Answers

- The dangers all appear in the first picture and are:
1. **Kettle.** Push your kettle to the back of the worktop.
 2. **Saucepan.** Turn pan handles in and use the back rings if you can.
 3. **Washing liquid.** Keep cleaning things out of reach and sight, ideally up high.
 4. **Hot drink.** Keep them well out of reach of babies and young children.
 5. **Toys left on the floor** can cause a nasty trip. Tidy them away.
